5,Introduction of Real plate

Any of our front panels can match with below rear panel :

Latch mechanism operation reaches at least 350,000 times; motor rotation operation reaches over 450,000 times; 800,000+ pcs of rear panels sold and used without any malfunction feedback since 2010. Defect rate is far less than 1/10000.

5.1 The Motor in the 3rd Generation Rear Panel

Mabuchi Motor

Reliable and rest

Powerful and Silent

Mabuchi Motor, powerful and strong, you can hear smooth operation sound when unlocking, it is from Mabuchi Motor.

2000 Rpm

26dB

High speed

Super silence

Motor is the heart of the lock, Ilockey adopts Japan MABUCHI micro-motors which ensure 350,000 running times without problem, the malfunction rate is far less than 1/10000.

5.2 PCBA Quality Control:

If Motor is the heart of the lock, chip should be the brain of the lock, with the latest model of Philip chipset, the lock rate increase 30% of performance.
The malfunction rate is far less than 1/1000.
At mean time, It past the CE and FCC test.

5.3 Stainless steel latch

Stainless steel latch
Strong and durable

5.4 Brass insert screw nut

Brass screw nuts inside of the location hole make sure the front panel structure robust and reliable.
